

EBR Forensics

Presents:

Basic Crime Scene Investigation

October 15th – 19th, 2018

Hosted by:

League City Police Department

555 W. Walker St

League City, TX 77573

Crime scene investigation involves documenting observations at the crime scene with notes, photographs/video, sketches and properly collecting valuable evidence. This 40 hour course will outline the responsibilities of the personnel who investigate crime scenes as well as crash scenes. The course will emphasize the importance of scene security, proper documentation and collection of physical evidence.

This 40 hour course was developed as a new or refresher workshop for first responders, crime scene investigators, or for the new officer/investigator with limited exposure and experience in crime scene processing.

\$525.00 Per Student

Topics discussed:

- Importance of Crime Scene Security
- Proper Scene Documentation
- Documentation and Collection of Evidence
- Basic Photography Techniques
- Forensic Mapping Techniques
- Latent Print Developing
- Documenting Bloodstains and Bullet Defects
- Discussion of new techniques used to process Crime Scenes

Detective Sergeant Kyle King supervises all forensic operations for the Indian River County Sheriff's Office in Vero Beach, Florida. He has been a law enforcement officer with IRCS since 1989, with the majority of his career working in criminal investigations. Sergeant King is an IAI Certified Senior Crime Scene Analyst and an IAI Certified Forensic Photographer. He is a member of the IAI Forensic Identification Committee and a member of the FDI AI Forensic Photography Committee. Sgt. King has taught numerous forensic courses over the last few years and continues to provide state of art instruction for all who attend his classes.
